Virginia farmers have a "Y for Victory" sign all their own. Their reply to the urgent request for more vital foodstuffs in 1942 was 15.5 per cent more milk, 19 per cent more eggs, 20 per cent more corn, 11.5 per cent more beef, and 10 per cent more pork. The County War Board says that farmers will do it.

The King Seeking Man's Help (Mark 11: 1-7).
How surprising that the One who humbly, and yet in royal majesty, to present Himself as Israel's King, the last week was the most important of all, and to it more space is given (in Scripture) than to any one whole year of Jesus' ministry? (Dr. A. A. Baldwin Sunday afternoon).
The first day of that week found our Lord riding into Jerusalem in humility, and yet in royal majesty, to present Himself as Israel's King.

SOUTHERN STATES COOPERATIVE FARM BULLETIN

Eggs Next Fall Means Feed Now

Getting the maximum number of eggs from hens is a matter of FIRST, building a flock capable of laying all the eggs the birds inherited the ability to lay. And SECOND, managing and feeding layers in a way to encourage the largest production.
The chicks you put out this spring should be fed the best feed and handled carefully with a view to having an outstanding flock of layers next fall. This does not mean that you have to over-feed them or spend unnecessary amounts of money on feed.
A good grass range will help you cut down on the feed bill. If birds are turned loose in succulent grass they will get some of their feed requirements from it. The most important thing is to keep these birds on STARTING & GROWING MASH or CHICK STARTER until the time they go into the laying house. When they are beginning to drop eggs on the range get the laying house ready and put them in. Then is the time to switch to one of the good Southern States open formula laying mash.
If you have raised a good quality of grain or if you have laid up a good supply of government feed wheat, you can cut your feed bill by using LAYING MASH CONCENTRATE with the ground grain.
